### **New Precision JUMBO COLOR®: ILG Strengthens JUMBO COLOR® Line with Proprietary Advanced Color Technology System™.**

**WOODLAND HILLS, Calif.** — ILG (International Laser Group) improves its line of **JUMBO COLOR®** cartridges with proprietary advanced color technologies. The new precision JUMBO COLOR® features additions of two innovative technologies to enhance overall print quality, offering optimum quality color output at highest page yield capacity.

The exclusive **JUMBO COLOR®** line provides an excellent OEM alternative solution to the high-cost HP color. It offers 20% to 30% higher page yield with the same outstanding quality, vivid color output, and clean streak-proof print that matches OEM.

The secret behind the quality of ILG's Color imaging supplies is in ILG's comprehensive selection of premium components and stringent manufacturing standards. ILG's new technology includes the addition of two proprietary systems: The **TCB Technology™** with Turbo Cleaning Blade™, a system to eliminate the toner build-up; and the **Leak Guard System™**, a non-split cartridge system with leak proof gasket seal. Both new technologies were added to their JUMBO COLOR® cartridges.

The implementation of these systems has improved the satisfaction rate of ILG's Color line. The **JUMBO COLOR®** is a compatible laser cartridge designed for use in HP Printers: **3600, 3800, CP3505, CP3525, CM3530 MFP, 4600, 4610, 4650 and HP 4700** series. All JUMBO COLOR® cartridges offer a minimum 20% higher yield compared to OEM standard yield. JUMBO COLOR® cartridge provides an intelligent alternative to the popular HP brand at a substantial cost savings.

Joe Shulman, V.P. of client relations commented "The quality and value behind ILG's cartridges are in our excellent engineering systems. Our quality assurance philosophy is one of continuous learning and improving. Our Product performance is benchmarked against the OEM cartridge on a variety of parameters including print image quality, solid image density, resolution, and page yield. Launching these new systems has positioned ILG as the best and the highest quality manufacturer of **'Mirror-Image'** cartridges in our entire industry."

Headquartered in Woodland Hills, California, ILG distributes from four additional distribution facilities in Illinois, Texas, Pennsylvania and San Diego enabling us to offer next day delivery. Each toner cartridge offers a 2 year warranty with a 100% satisfaction guarantee.
