ILG introduces the Leak Guard System™ a Major Technical Advance for Compatible Color Cartridges

Leak Guard System™

HP Color (oem alternative)

**Dell 3110cn/3115cn series*

ILG has developed the **Leak Guard System™**, a unique advanced technology designed to improve the performance of compatible color cartridges. The exclusive **Leak Guard System™** incorporates a number of features to eliminate toner leaking, improve print performance and reduce printer maintenance costs.

ILG's proprietary **Leak Guard System™** incorporates the following unique features:

- A non-split cartridge system, ensuring cartridge stability
- Improved dimensional control of critical imaging components
- 100% testing of transit seal integrity
- Improved gasket seal components

Users of ILG' Compatible Color Cartridges with the **Leak Guard System™** gain the following advantages:

- Virtual elimination of toner leaking during transit
- A clean seal pull, minimizing toner dusting
- Elimination of excess toner on print output
- A cleaner printer, reducing maintenance costs
- Extended life of printer transfer belts and fusers

The introduction of the **Leak Guard System™** closely follows the recent announcement of ILG's development of **TCB Technology™** utilizing ILG's proprietary **Turbo Cleaning Blade™** in its color cartridge line. The **Turbo**

Cleaning Blade was designed to improve the cleaning of excess toner build-up from the photo-sensitive receptor drum, thus maintaining the consistency of color print quality from beginning to end of cartridge life.

“ILG’s Engineering Team has been leading the industry in color cartridge manufacturing for several years now”, said Joe Shulman, VP. “We invest heavily in R & D, and we now utilize these innovative technologies in our entire HP color alternative line. We continue to set a higher standard and these new innovations have further proven ILG’s color cartridges are the best match to OEM cartridges in quality and consistency”

ILG offers an extensive line of more than 700 SKU’s of HP and other quality OEM alternative color and monochrome products, available for next day delivery through four geographically dispersed distribution centers. ILG’s offering includes an exclusive **JUMBO COLOR™** cartridge line as well as over 200 SKU’s of color cartridges.
