ILG'S INNOVATIVE BREAKTHROUGH
**ILG announces the development of the Turbo Cleaning Blade,
'TCB Technology™' to their Color Toner Cartridges**

ILG (International Laser Group) announces the development of **TCB Technology™** utilizing their proprietary **Turbo Cleaning Blade** in their color toner cartridge line.

ILG's precision **Turbo Cleaning Blade** is designed to improve the cleaning of excess toner build-up from the photo-sensitive receptor drum, maintaining the consistency of color print quality from beginning to end of cartridge life. This advanced technology prevents streaking, lines and other color print inconsistencies that have affected many compatible cartridges.

The development of **TCB Technology™** is a result of ILG's continuous innovation in R & D and a solid partnership between our engineers and component manufacturers. The cleaning blade is an integral component to the cartridge manufacturing process, but with TCB, ILG can now address many challenges to OEM alternative products.

ILG's **Leak-Guard™** sealing system, and **Color Match System™** guarantee their products to be free from defects. ILG is the best match to OEM in performance and satisfaction.

"ILG is the only company to utilize TCB Technology™ in color cartridges. We are the technology leader and set a higher performance standard in the OEM alternative market. Our manufacturing process has now gone one step further. We are now truly a "**Mirror-Image**" to the OEM cartridge." Said, Joe Shulman, V.P. of client relations."

ILG's North American manufacturing and assembly facilities with their stringent quality control systems guarantees every toner cartridge best matches OEM performance.

ILG offers an extensive line of HP and other quality OEM alternative products in monochrome and color. Our 700 SKU's of in-depth product lines, including our exclusive JUMBO COLOR® toner line and over 200 SKU's of color products, are available for next day delivery through our four nationwide strategically located distribution centers.

ILG is one of the world's top private-label and private box contract manufacturers in North America. Each and every ILG printer cartridge is 100% guaranteed and is STMC certified. ILG is headquartered in Woodland Hills, California.
